CTCA President

## Systems/Protocols Supported and Taught Worldwide

### Military C4ISR

- ADOCS
- JADOCS
- CPOF
- CGS
- LandWarrior
- COC/CPOF (In-theater)
- NET Training (CONUS) for COC/CPOF
- TIGR

### Civilian/Enterprise:

- Wireless: Point-to-Multipoint
- Wireless: Point-to-Point
- IP LANs/WANs/Networking
- Broadband Access Alternatives
- Layer 2 Switching/Layer 3 Routing
- Wireless Broadband Technologies

# Who is CTCA?

## About Us

CTCA.info has been providing Advanced Communications Technologies Support, Training, and Consulting for both the Department of Defense (e.g.: C4ISR technologies) as well as the Civilian Enterprise market (e.g.: Wired/Wireless Networking Protocols) across North America and 20+ other countries (including several locations “in theater”) for over a decade.

## Specifications:

CAGE CODE: 563R0  
DUNS: 154687078  
NAICS: **541330 (Primary)**, 238210, 515210, 517210, 541512, 541611, 541612, 541618, 561320, 611420, 611430, 611699, 928110

**Contracts:** Seaport-E (Prime)

**SBA Classification:** “Small Business” and “Emerging Small Business”

## Why CTCA?

For over a decade, Civilian and Department of Defense customers have turned to CTCA for assistance in learning-about, supporting, or running and managing their Advanced Communications Technology Systems.

From Manufacturers of networking equipment and communications devices, to the End Users who have to use and support the systems in the trenches of war (literally), to the frontlines of business competition, CTCA has been sought-out to provide customized, high-quality support needed for the mission...and we've DELIVERED!!!

### CTCA provides 'expert' support!

CTCA believes that to support a customer you have to have real experts who "know" the system from hands-on, in-the-field experience – not just from knowing how to find the answer in a manual. That is why our largest DoD and our largest Civilian customers chose us to support them – they know we bring EXPERTS to the mission!!!

*CTCA has provided world-class performance for our mission across North America as well as several hot zones outside of North America...they deliver!!!*

*(Logistics Manager, Large DoD Contractor)*

### CTCA's Past Performance covers North America (CONUS) and 20+ countries Outside North America (OCONUS)

CTCA has been asked to develop and/or deliver customized, professional solutions as well as provide staffing for missions across North America and almost two-dozen around the world. We have stepped-up to new challenges and delivered first-class performance that has received commendations from the End Users, themselves, as well as their upper-management or superior chain-of-command.

*Some of our FSRs had tough commutes to the "job site"*

### CTCA provides "professional" support – regardless of location or situation!

Professionals who support our Military understand that the "job site" might not be an air-conditioned office, and that when they show-up there might be unfriendly neighbors awaiting them (or waiting along the way). Several times our people reported their MRAPs had been hit hard, but NONE of the CTCA FSRs ever turned back! They all knew their Military Customer was counting on them to provide life-protecting support and applications...and we would NOT disappoint! That's what professionals do!!!

For both our Military and Civilian customers, CTCA has had presence and/or delivered support, training, staffing, consulting, and on-site delivery of hardware, software, and or logistics products on every continent (except Antarctic) in support of the mission. We Show-up – We Deliver – We Support – wherever the mission takes us, because that's what our customers need and expect!!!
